Healthy Skin and Productivity Go Hand in Hand

Help keep workers healthy and productive with GOJO hand hygiene solutions.

The GOJO Skin Health Programme for Tough Soil Environments

You have a **great** **WELLNESS PROGRAMME** in place

...so why are so many workers sick?

Maybe there's a gap.

Most wellness programmes focus on disease management by addressing smoking, exercise, diet, prenatal care, stress reduction... all the important lifestyle choices that impact long-term health. If yours doesn't include skin health, you might be missing an opportunity for more immediate results.

Poor hand hygiene habits can have a huge impact on business results.

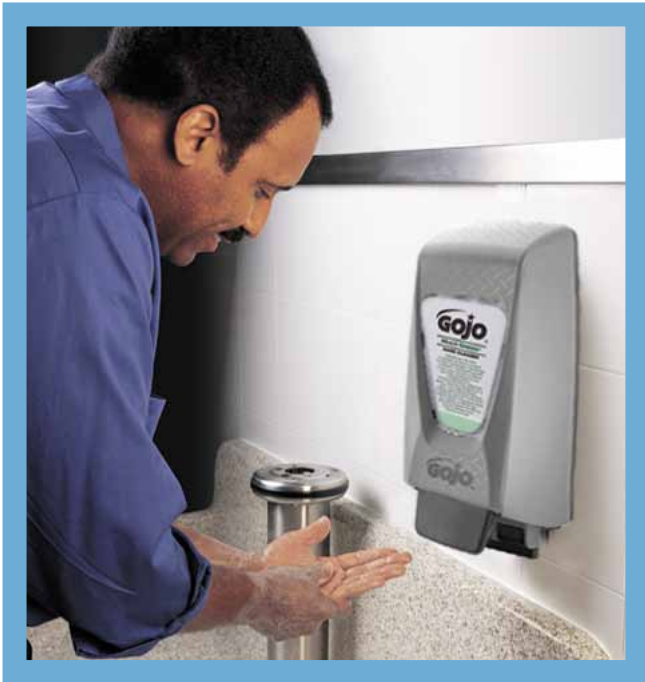

Germs spread by hands may lead to illness. And most work environments expose skin to a variety of skin risks that could lead to occupational dermatitis. In either case, you pay the price in:

- **Medical claims**
- **Lower productivity**
- **Unplanned absences**
- **Unskilled temporary labour**
- **Overtime**

*How does illness impact
your business?*

Make skin health part of your **WELLNESS PROGRAMME.** **Clean.**

REDUCE THE RISK OF EXPOSURE TO HARMFUL IRRITANTS

Condition.

REDUCE THE RISK OF OCCUPATIONAL SKIN DISEASE

Sanitise.

Focus on wellness and get results now with the GOJO Skin Health Programme for Tough Soil Environments.

GOJO makes it easy to integrate hand hygiene into your wellness programme. This simple programme helps reduce the spread of germs that may cause illness and helps prevent occupational skin disease.

The goal is to keep workers healthy and productive, and keep costs down.

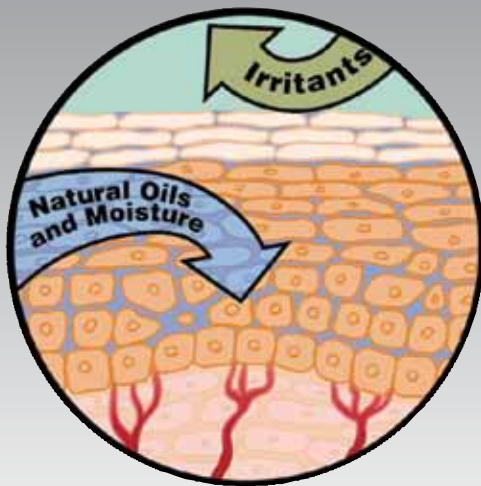

REDUCE THE RISK OF ILLNESS

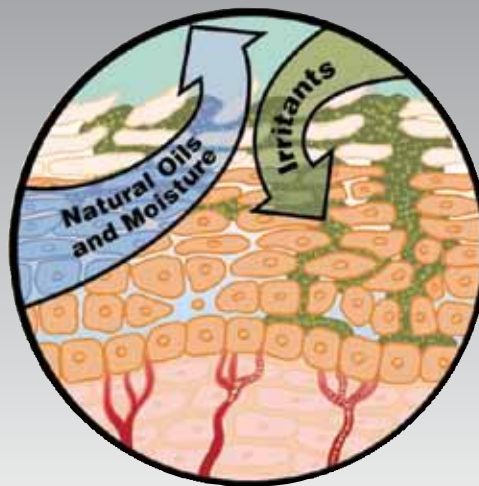

Occupational Skin **Diseases**

are among the three most frequent groups of
OCCUPATIONAL DISEASES.¹

Healthy Skin

Healthy, well-conditioned skin retains more moisture and is less likely to absorb and react to incidental exposure to irritants.

Damaged Skin

Tiny cracks in the surface of damaged skin permit natural oils and moisture to escape and allow outside substances to irritate and potentially enter the bloodstream.

Occupational skin diseases are estimated to cost €600 million each year. Resulting in around 3 million lost working days.²

There are many potential irritants in tough soil environments.

Dry, cracked skin can be very painful, many times resulting in bleeding, which poses risks to employee health and can have negative effects on worker productivity.

Since **all dirt is not created equal,** **you need options.**

Get **GOJO® DPX™**

With continued advancements in technology and processes, work environments are getting cleaner. When hands do get dirty, workers want to remove light and medium soils without using overly aggressive solvents and abrasives. Now they can. With GOJO ECO SOY™ Foaming Hand Cleaner in the new DPX dispenser, the grit-free foaming action gently releases dirt and moderate soils from the skin.

GOJO DPX Foam Soap Dispenser with GOJO ECO SOY Foaming Hand Cleaner

- Ideal for distribution, warehouse, laboratories, washrooms and production areas
- Diamond-plate dispenser design connects with workers
- Cleaning powered by soy, a renewable natural resource
- Invigorating fresh scent

Get **GOJO PRO™ TDX™**

Hands that get really dirty need an effective cleaner that won't be harsh on the skin. Our traditional product range of medium and heavy duty refills are still available now in the upgraded PRO TDX dispenser.

GOJO PRO TDX 2000 and GOJO PRO TDX 5000 Dispensers

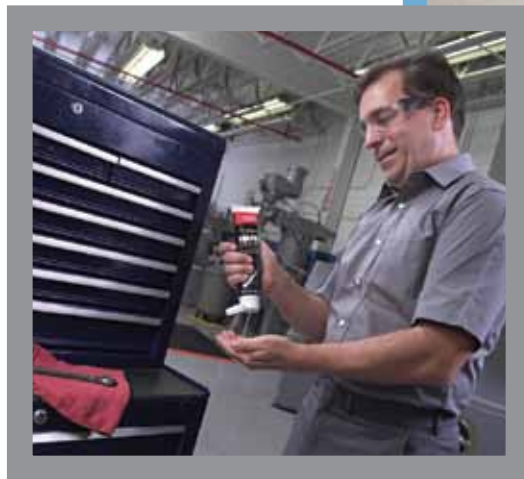

- Ideal for production, tool room, distribution and maintenance areas
- Modern design with diamond-plate effect looks great in manufacturing environments
- Available in the formulas that you know and trust

Our strategy:

Maintain the skin's natural **BARRIER** function.

Clean.

Use only the mildest, most effective hand cleaners to help maintain good skin health and address the costs associated with occupational skin disease.

Condition.

Conditioning skin not only helps improve how skin looks and feels, workers can be more productive when their skin is in good condition. Well conditioned skin also makes washing faster and better.

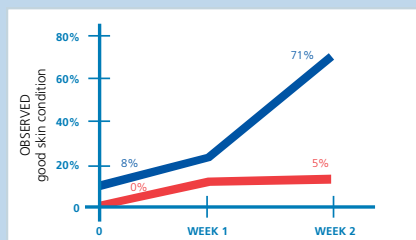

GOJO provides assistance in recommending the right products in the right places. In addition, we offer a complete training programme with videos, instructional posters and handouts to help build good hand hygiene behaviour. **We make it easy for you to get more results from your wellness programme.**

Proven Results in 14 DAYS.³

Outcome studies confirm consistently significant results in improving skin condition – in two weeks or less.

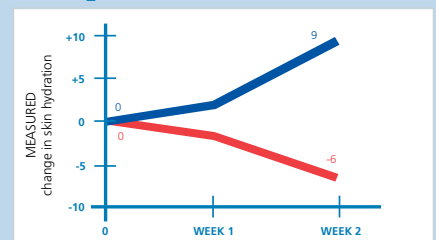

- GOJO REGIME
- CONTROL GROUP

Workers felt it.

Workers following the GOJO programme, including training and recommended skin care practices, could see and feel the difference in their own skin. After implementing the GOJO programme, 71% of workers rated their skin as "good," while only 5% of the control group did so.

Data proved it.

We used scientific instruments to measure skin hydration, the amount of moisture in the outer layers of the skin, which helps to keep skin intact and prevent cracking. This confirmed that workers using the GOJO programme had significantly better skin condition than the control group.

One touch...

and **SUDDENLY** the germs are **spreading.**

ARE YOU PREPARED FOR AN ILLNESS OUTBREAK?

Most germs are spread by hands, and hands carry germs throughout the workplace. With one touch, germs spread to co-workers and work surfaces.

Why don't we just wash?

Because soap and water are in the washroom. We're busy at work and it's not realistic to go to the washroom every time we cough, sneeze or shake hands.

Help **stop**

the spread of germs with **PURELL®** sanitiser.

Sanitise.

Many options for easy access.

PURELL Advanced Hygienic Hand Rub kills 99.99% of most common germs that may be harmful. It's the brand people know and trust.

Put PURELL sanitiser where the germs are.

Germs are everywhere. That's why it's important to put PURELL sanitiser in areas where it will be easily accessible to employees and visitors.

PROVEN RESULTS IN ABSENTEEISM.

Results of outcome studies show significant decreases in absenteeism due to illness following the implementation of a hand hygiene programme using alcohol-based hand sanitiser.

Healthy hands for the lives you touch
