

Surface Cleaning

USAGE GUIDE

By providing PURELL® surface sanitizers and disinfectants around your facility, you can empower occupants to contribute to surface cleanliness. Use this guide to help decide which product to use.

Fast and Effective Against Germs

PURELL one-step surface sanitizers and disinfectants quickly kill 99.9% of germs on a variety of surfaces, including human coronavirus.*

Best-in-Category Safety

PURELL Surface Sanitizing and Disinfecting sprays have the EPA's lowest allowable toxicity rating and EPA Design for the Environment (DfE) certification. That means there's no need for gloves, handwashing, or rinsing after use – even on food contact surfaces – making PURELL products ideal for non-custodial staff and worry-free use around students.

When to Use PURELL Surface Disinfecting Wipes

- Cleaning a smaller surface area
- Frequent, quick cleanings
- Hard surfaces

When to Use PURELL Surface Sprays

- Cleaning a larger surface area
- Less frequent, deep cleanings
- Soft and hard surfaces

Read the Label. Always read the label of a surface product carefully and follow all use instructions. Refer to our guide, “How to read the label,” for more information.

*Coronavirus disease 2019 (COVID-19) is caused by SARS-CoV-2. PURELL® Surface Sanitizer and Disinfectant Sprays kill similar viruses and therefore can be used against SARS-CoV-2 when used in accordance with the directions for use against Hepatitis A Virus (1-minute) on hard, non-porous surfaces. PURELL® Surface Sanitizer and Disinfectant Wipes kill similar viruses and therefore can be used against SARS-CoV-2 when used in accordance with the directions for use against Feline Calicivirus (5-minute) on hard, non-porous surfaces. Refer to the CDC website at <https://www.cdc.gov/coronavirus/index.html> for additional information.
