THE PURELL® BRAND LAUNCHES PURELL™ BODY FLUID SPILL KITS

A single-use response kit, featuring PURELL® products, that allows foodservice employees to respond quickly and safely.

AKRON, Ohio, and CHICAGO (May 22, 2018) – GOJO, the makers of PURELL® products, and OSHAKits.com have introduced the PURELL™ Body Fluid Spill Kit, a complete, single-use solution designed to allow foodservice employees to quickly, easily and safely respond to accidents and spills involving bodily fluids.

“Proactive planning is key to a strong food safety program, and the new PURELL™ Body Fluid Spill Kit helps ensure you are ready for unexpected events,” said Diane Collins, foodservice market development director, GOJO. “This food safety response kit contains a comprehensive set of components that work together to prevent cross contamination over multiple events protecting both guests and workers from possible foodborne illness outbreaks. These products deliver quick and powerful germ kill with PURELL PEACE OF MIND™.”

The core of each single-use kit is an 8-oz. bottle of PURELL® Foodservice Surface Sanitizer, which contains no harsh fumes or chemicals. The product offers rapid kill times, including killing norovirus, E. coli and salmonella in 30 seconds, and multi-surface performance with no rinse required on food contact surfaces. Other components include:

PURELL® Advanced Hand Sanitizer Single Use
Head-to-toe personal protection kit
Large trash bag and tie
Heavy-duty, hand-held scraper and mop

OSHAKits.com Absorbent Blend with Deodorizer
Three medical-grade absorbent towels
Bilingual instruction guide and training video
Spill collection system

“Today, most state and local health departments require foodservice establishments to have procedures for employees to follow when responding to vomit and diarrhea spills,” said Owen Griffin, business development manager, OSHAKits.com. “The PURELL™ Body Fluid Spill Kit helps foodservice establishments ensure they are compliant with state and local health department requirements, while also helping to protect against foodborne illness outbreaks.”
